Hiring Team,
thinkcell
Berlin, Germany

Dear Hiring Team,

I am writing to apply for the Test Engineer position in Berlin. I have 3+ years of professional experience in software testing, with hands-on responsibility for functional, regression and exploratory testing, test-case design, defect analysis and release validation across web, mobile and kiosk applications.

In my current experience, I have tested complex SaaS products, performed full regression cycles before releases, reproduced and documented critical defects, and worked closely with developers to verify fixes and production hotfixes. And I am currently developing my Playwright automation skills with JavaScript/TypeScript.

The opportunity to contribute to the quality of a widely used product integrated with Microsoft PowerPoint and Excel particularly interests me. I would be glad to bring my structured testing approach, problem-solving skills and attention to detail to think-cell's testing team.

Thank you for considering my application.

Kind regards,
Karan Joshi
